## EXPERIENCE

### Ofssam, Gurgaon — General Manager

JULY 2015 - PRESENT

Ofssam is a US-based IT software, training & staffing startup that specializes in producing Job-Ready programmers & data analysts out of college graduates and placing them with Fortune 1000 firms. Job-Ready talent is turnkey talent that is productive on day-1 of its employment.

Responsibilities include · software development · team mgt. · training · course design & development · business development · strategic planning · recruitment · promotion · operations.

- Architected a scalable, secure and high-performance enterprise CRM application based on Node.js/Express stack: a real-world project for our bootcamp students for hands-on learning of programming, TDD, design patterns and industry best practices.
- Lead and manage team of budding junior programmers, in Minneapolis-St. Paul, US, to develop the CRM application using Agile-SCRUM methodology. Educate them using our proprietary Just-in-time Learning technique.
- Delivered more than 20 mobile app and data analytics sessions to large audiences in India and US.
- Developed 3 IT courses & 2 workshops, that were highly appreciated by leaderships at Indian & US universities.
- Architected & created our cloud-based learning platform & apps.
- Partnered with Ansal University (India) for our industry-focused Civil Engg. course for their second and third year students.
- Established relationships with leaderships at reputed northern India universities, including Amity, Manav Rachna, Lovely and Apeejay universities, and conducted technical workshops.
- Recruited part-time instructors working as senior enggs. at top companies, such as Fluor, Bechtel, Punj Lloyd, TCS & Accenture.
- Recruited 12 candidates from reputed job fairs in US for full-time openings with our clients and for our training programs.

Professional, 2006

## **Accenture, Gurgaon — Software Engg. Team Lead**

AUGUST 2009 - JULY 2015

Started my career with Accenture. Joined as an Associate Software Engineer and, in short time, rose to the rank of Software Engineer, Senior Software Engineer and finally Team Lead.

Led an R&D project, CIO Beta Innovation, serving as its technical lead and architect. At Beta Innovation, followed Agile methodology to create internal and for-client enterprise web & mobile applications. Created prototypes using cutting-edge technologies to develop new apps.

Responsibilities included • supervising junior & senior developers • project planning & estimations • architecting apps • technical consulting to other teams • internal & external recruitment interviews • ideation for new products • delivering local- and country-level trainings.

- Led the development of 4 for-client apps and 10+ internal apps.
- Created or contributed to more than 30 applications.
- Served as Learning & Trainings lead for the entire delivery unit.
- Served as a Subject Matter Expert on web & mobile technologies.
- Created Gallery, Accenture's photo-sharing social network.
- Worked with manager on a revenue model for Gallery and brought in thousands of dollars from various clients.
- Saved my business unit \$30k by taking over development of an app originally outsourced to a third party.
- Took the initiative to introduce an open-source technology stack to modernize development and save costs.
- Did a lot of coding for our apps, especially in their early stages.

## **EDUCATION**

### **National Institute of Technology, Jalandhar — B.Tech**

COMPUTER SCIENCE & ENGINEERING

AUGUST 2005 - MAY 2009

## **AFFILIATIONS**

### **OpenMandriva — Lead, Infrastructure**

FRENCH NON-PROFIT OPEN SOURCE ORGANIZATION

DECEMBER 2012 - PRESENT

Lead OpenMandriva's technical infrastructure, including data center, servers, websites and community services. Regularly take part in key strategic decisions of the Council. Presented a lightening talk at [FOSDEM '14](#), Belgium as part of OpenMandriva's delegation.

## **AWARDS**

Wrote 60+ articles, stories and reviews for muktware.com.

## **Granular — Founder & Lead**

LINUX DISTRIBUTION

DECEMBER 2006 - 2010

Led a global team of contributors to deliver high-quality releases and support the product through our own channels, such as forums & email.

Featured in popular computer magazines, such as Digit & PCWorld.

## **ENDORSEMENTS**

### **Ken Corless — Principal, Deloitte Consulting**

ken@corless.com

(formerly Managing Director, Accenture)

“Anurag has been a very strong performer in his peer group of analyst programmers. Just on my team, he is one of about 800 at that level and Anurag's contributions consistently place him in the top quartile, usually in the top 10%. His ability to get things done, his strong desire to learn and be challenged, and his very positive attitude are his key differentiators. He has a great attitude that can be infectious to others.”

### **Sushil Rana — Founder & Creative Head, Ofssam**

srana@ofssam.com

“Anurag has been involved with Ofssam since its early days. Coming from programming background, Anurag has not only performed very well in programming related tasks but also quickly learnt and excelled in management and operational tasks. An intelligent, passionate and hard working individual, he has adapted well to fast paced startup environment and has been instrumental in the design and development of our products and strategic initiatives. I highly recommend Anurag.”

### **Ajay K. Sharma — Head of Department, Computer Science, NIT Jalandhar**

sharmaajayk@rediffmail.com

“I have known Anurag Bhandari for a period of 2 years, which gives me an opportunity to evaluate him over a considerable period of time. It was when I started dealing with this student, that I realized the teammanship and willingness to work hard he possesses. He has always shown the ability to conscientiously carry out responsibilities. My interaction with Anurag has always presented a very pleasant disposition and a comely personality. His communication skills allow him to express himself clearly and concisely.”

### **Kate Lebedeff — Secretary, OpenMandriva Association**

kate@lebedeff.co.uk

“High-skilled, knowing the freshest solutions available for your needs, quick in implementing them. With Anurag you get a responsible IT partner with deep knowledge and good experience. It is just a pleasure to work with him, a great team player, who can also run things on his own whenever needed.”
